

Frontend Developer Test

Goal

Re-create the provided mockups utilizing HTML, CSS (or SCSS), JavaScript/JQuery, or any other languages/libraries you see fit. Include the below requirements for functionality. We encourage you to add any additional styling/functionality to improve the UX/UI. You have 48 hours to complete this and send us your progress. Please let us know if you have any questions or concerns.

Requirements

- Create 1 HTML page that:
 - Saves a cookie called "visitedSite" and sets a value of true when the page loads
 - Allow the user to select or unselect an icon to purchase. Once an icon is selected, activate the next button – if an icon is unselected, disable the button
 - Allow the user to put in their payment information - Ensure the CVV is hidden for security reasons
- Please make sure the page is responsive as it sizes down from desktop to mobile
- Include any ADA knowledge you may have to make the page as compliant as possible

Resources provided

1. Mockups for "Buy an Icon"
 - a. Step 1: Selecting an icon
 - i. Not selected:
 1. Desktop: Buy an Icon - Step 1.png
 2. Mobile: Buy an Icon - Step 1 – mobile.png
